Hiring Manager
Axxela

Dear Hiring Manager,

I am writing to express my strong interest in the Trading Analyst position at Axxela. As a recent graduate in Artificial Intelligence from NITK Surathkal, with a foundation in machine learning, data analysis, and two years of hands-on trading experience in US, Indian, and Forex markets, I am confident in my ability to contribute meaningfully to your trading team.

Over the past two years, I have actively analyzed and traded across multiple markets using ICT concepts, market structure, and macroeconomic drivers. My experience includes managing a personal portfolio, applying disciplined risk management, and studying market microstructure and liquidity dynamics. I use platforms such as TradingView, Zerodha, Interactive Brokers, and MetaTrader to refine and execute strategies.

Additionally, my academic background includes several applied ML and NLP projects such as human value detection, food hazard classification, and physiological stress detection. These have strengthened my quantitative thinking, data handling skills, and model-driven analysis key strengths I bring to a trading desk.

What excites me about this opportunity is the chance to blend my passion for financial markets with my analytical and AI skill set. I thrive in fast-paced environments and am eager to grow in a data driven trading role at Axxela.

Thank you for considering my application. I've attached my resume for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,
Chinta Thejdeep Reddy
